Learning Outcome/product

I can give examples of things that might influence a person to take risks online. I can explain that I have a choice.
I can say the percentage of people aged 11-15 years old that smoke in the UK (3%) and I can give reasons why some people think it's a lot more than this.

Assessment records	List only those children who have not achieved the expected outcomes.

End of unit assessment question

Pre Unit Assessment

Start by explaining to the children that this is not a test – it's just finding out about their thoughts and ideas. It's important not to prompt the children too much as the pre unit activity establishes their existing awareness of the subject/issues.

Hand out the Pupil Assessment activity sheet (I have saved a pdf alongside the MTP in the same folder).

Children have a look at each of the scenarios on the sheet and write what they could do in each situation. Explain that they are going to look at this again in a few weeks' time, so try to leave some space to add some more ideas, then. But they can always go onto the back of the page to add more ideas.

End of Unit Assessment

Hand out the same pupil assessment activity sheet completed previously, then repeat the same instruction as before. Ask the children to add any new ideas to their original ones.

Children use a different colour pencil or pen to record their answers this time.
